Understanding agility

Agility is the most used buzzword in today's management lingo. In this intensive learning lab, you'll get a better understanding about agile mindset, agile concepts and agile working tools. We'll help you to avoid merely following a trend. You'll get a clearer picture of what works and does not work. By working on your own challenges, you will bring back nuggets, new ideas and fresh thoughts as to how you can foster your agile transformation process.

ICG Consultants

Manfred Höfler

András Karácsonyi

They have secured a very strong foothold in the Dutch market and have an excellent network with all major industries.

Questions you might have

- What is agile transformation about?
- How can we scale agile working methods to whole organizations (besides IT)?
- How can our leaders develop an agile mindset?
- What kind of transformation process would help us to create real movement towards agility and prevent us from just playing »agile leaders«?
- Which agile concepts fit to our context and how can we customize them to create high impact?
- What are typical pitfalls we should avoid?
- What are the requirements in order to transform towards agility and what kind of »side effects« have to be expected?
- How can we tackle our own challenges with agility?

Why work in a lab?

We act as a host and bring together people who want to deepen their knowledge about agility. If you already have practical experience with the topic and you want to share, learn and take away key findings for your own challenge, join us at the lab.

How will we work?

- Inspiring exercises
- Short input talks
- Coaching sessions in small groups
- Sharing sessions about tools and practical experience

Your bonus

Sometimes after attending a workshop or seminar questions pop up later on. After attending our lab we offer you a free coaching session with one of our experts who will answer your specific questions.
