Design Thinking

DESIGN THINKING

The primary purpose of this workshop is to learn Design Thinking by gaining practical experience in applying the methodology to a specific subject.

Design thinking fundamentally shifts an organization's mindset to be more human-centric, innovative, and collaborative

People benefit: they develop empathy and user-centricity, creativity & innovation, collaboration and teamwork. They learn how to operate with an iterative and experimental mindset and how to integrate user feedback and validation.

Organisation benefit: Learning design thinking empowers individuals and organisations to take ownership of challenges and believe in their ability to create positive change. It builds confidence in problem-solving, encourages a proactive approach, and nurtures a mindset of continuous learning and growth

The **Program** includes the Design Thinking methodology, offers hands-on experience with a simplified Design Thinking process on a specific subject, and provides opportunities to experiment with various tools at each Design Thinking process step. Additionally, it concludes by presenting 5 principles on how to organize Design Thinking projects.

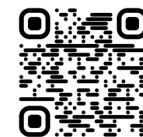

The program can be configured depending on the group or specific requirements.

Participants: max. 15 Persons (classroom or online)

Cost: starting from ~~1.400~~ 900 EUR
